

Fast and easy access to knowledge resources from every area of campus, due to network connectivity

Akademia Morska - Maritime Academy

CHALLENGES

- Obsolete cabling in the buildings was not able to support growing requests for network access from students
- A new cabling structure solution was too expensive and, due to the historical status of the buildings, required additional permissions
- Network needed to be resilient and secure, covering both the dormitory and campus areas

PRODUCTS & SOLUTIONS

- 2 x Alcatel-Lucent OmniAccess™ 4604 standalone WLAN switches
- 44 x Alcatel-Lucent OmniAccess™ AP61 + OmniAccess Wireless LAN Access Points

BUSINESS & TECHNICAL BENEFITS

- Fast deployment and competitive pricing compared to fixed network
- Students able to securely access the right college resources from their rooms in the dormitory areas, as well as across the entire campus grounds
- Easy to manage solution with ARM feature optimizing radio performance

DEAL FACTS & FIGURES

- Date deal won: November 2009
- Implementation date: February 2010
- VAD: Veracom and installation realized by X-Comp

“Internet allows easy and fast access to knowledge resources from every area of life on campus. It is a fast and inexpensive method of communication. To be perceived as a modern college, we decided to provide our students easy access to knowledge, whether they are in the campus or in the dormitory”.

Stanislaw Gucma, Rector of Akademia Morska
