

Alcatel-Lucent Enterprise OpenTouch Suite for SMB for Insurance Offices

Serve clients
better and
increase
efficiency

The **Alcatel-Lucent Enterprise OpenTouch® Suite for SMB** for Insurance Offices enables you to better serve your clients and collaborate with your colleagues using an efficient, feature-rich communication system. The **OpenTouch Suite for SMB** provides seamless, flexible services to quickly address clients' needs and help ensure their satisfaction.

TRENDS IN THE INSURANCE INDUSTRY

Faced with continued economic uncertainty and low interest rates, insurance firms are focusing on cost reduction and new avenues for profitability in an increasingly mobile, customer-driven marketplace (2013 Trends to Watch: Insurance, Ovum, October 2012).

CHALLENGES FOR INSURANCE OFFICES

Clients are looking for low-cost insurance solutions that suit their particular needs, and they are increasingly investigating their options online. When clients call your office, staff must work hard to deliver superior service and ensure satisfaction. The communication system must provide end-to-end call management, with a professional welcome and efficient call routing to the relevant department. The system must handle call overflow when you are busy serving a client. If you leave your office, you must be able to forward calls to voice mail and check voice mail remotely while maintaining privacy. To increase productivity, the system needs to provide tools for collaborative communications with your colleagues as well as integration with insurance office operations.

ALCATEL-LUCENT ENTERPRISE OPENTOUCH SUITE FOR SMB TO THE RESCUE

The Alcatel-Lucent Enterprise OpenTouch Suite for SMB for Insurance Offices tailors the communication system to your unique needs, whether it is a small insurance agency branch or a central office, by providing:

- + Feature-rich applications that improve client service and call handling
- + Flexible communication server and network infrastructure with powerful embedded features
- + A range of wireline phones for professional IP or digital telephony

BETTER CLIENT SERVICE AND INCREASED STAFF PRODUCTIVITY

- + Professional welcome and efficient Smart Call Routing (SCR)
- + Advanced business telephony services and rich collaborative conversation features for improved efficiency and staff productivity
- + Powerful tools for federating contact lists and presence information

END-TO-END CALL MANAGEMENT AND FEATURE-RICH PHONES

- + SCR with Automated Attendant (AA), providing an automatic answer and efficient, direct forwarding to the right company destination
- + End-to-end call management, call-waiting queue and dispatch with Automatic Call Distribution (ACD) to Call Center Office agents
- + For larger insurance offices, the Alcatel-Lucent Enterprise PIMphony™ application for optimized PC telephony
- + Professional wireline phones with integrated management and energy-efficiency features

REDUCED COSTS

- + A combination receptionist and answering service without a salary
- + Complete, scalable solution that is easy to install, maintain and expand
- + Single infrastructure for voice/data services, with a simple management interface and low power consumption
